

ANNUAL SERVICE and TUNE-UP

A SERVICE EVERY HOME SHOULD HAVE

Dear Panco Oil Customer,

Every oil burner should be cleaned and adjusted every year. This assures better, lower cost operation. Also, scale should be removed from the heating unit because it will seriously impair the efficiency of your heating system if allowed to accumulate.

We perform this service for our regular oil customers at a cost so low that it is one of the best investments you can make in household economy and comfort!

All Of The Following Is Included:

- Wire brushing and vacuum cleaning of boiler or furnace internals to remove scale.
- Cleaning of smoke pipe to base of chimney and check chimney for proper draft.
- Inspection and checking of furnace, boiler or hot water heater.
- Replace oil burner strainer, nozzle and filter, check and clean electrodes, air tube and fan housing.
- Brush and vacuum oil burner fresh air intake to remove lint and dust.
- Testing of oil pump for proper vacuum and pressure, inspecting oil lines and oil tank.
- Lubrication of oil burner and circulator.
- Checking of oil burner for efficiency and economy and adjusting for zero smoke and maximum efficiency using Bacharach Instruments.

**We heartily recommend that you arrange now to have this service.
All you need to do is call to schedule.**
